

2nd **IMCR/Joint Usage Research Program**
Young Researcher Development Program Seminar

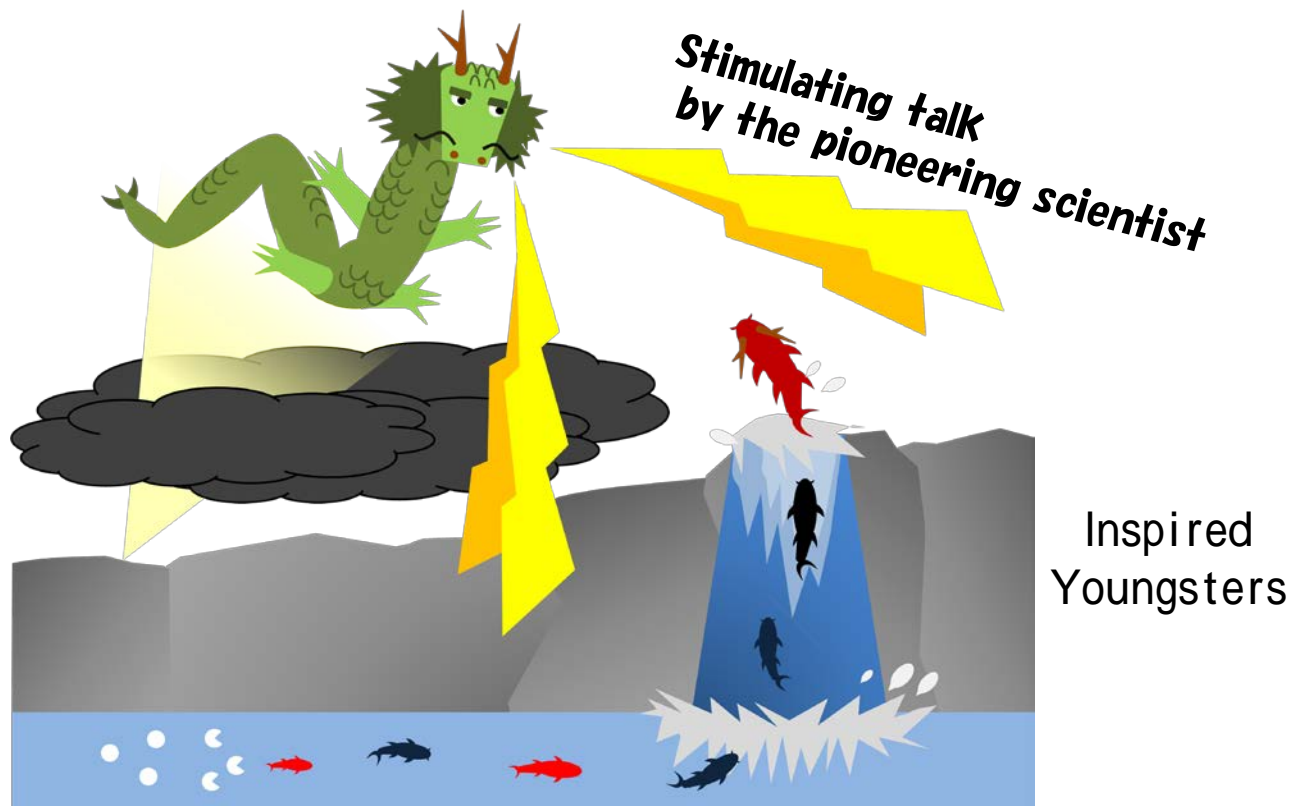

Speaker: Dr. Hiroyuki Sasaki

Professor, Medical Institute of Bioregulation, Kyushu University
Vice President, Kyushu University

Epigenetics in Embryonic Development and Disease: Prediction and Serendipity in Science

Date & Time : Dec 15, 2017 16:30—18:30 (Lecture + Q&A)

Place: Large lecture Hall, School of Medicine, Gunma Univ.

- Internationally-renowned basic biologists will share with us their scientific research and motivation and philosophy behind their research.
- The aim of the seminar is to provide an occasion for young researcher to be inspired by top-notch science and research philosophy.

Dr. Sasaki is a recipient of won following awards:

Purple Ribbon (2015), The Kihara Prize (The Genetics Society of Japan, 2012), Society Award (The Japan Society of Human Genetics, 2009)

Reception hosted by young researchers at “Cinema” after the lecture (reservation required)
