

Global COE International Symposium

Plenary Lectures on the Pathogenesis of Diabetes Mellitus

Date: May 26th, 2008

Place: Institute for Molecular and Cellular Regulation, Gunma University

13:30~13:40 Opening Remarks

Itaru Kojima (Leader of Global COE program, Gunma Univ.)

Session I Chair: Tadahiro Kitamura (Institute for Mol & Cell Regulation, Gunma Univ.)

13:40~14:40 "Recent insight in the pathogenesis of diabetes"

Prof. Domenico Accili (Columbia University, New York, USA)

14:40~14:50 Coffee Break

Session II Chair: Tetsuro Izumi (Institute for Mol & Cell Regulation, Gunma Univ.)

14:50~15:50 "How do beta cells count their insulin granules?"

Prof. Michele Solimena (Dresden University, Dresden, Germany)

15:50~16:00 Coffee Break

Session III Chair: Masahiko Kurabayashi (Department of Medicine, Gunma Univ.)

16:00~17:00 "The effects of TRB3 polymorphisms on islet dysfunction and type 2 diabetes"

Prof. Rohit Kulkarni (Joslin Diabetes Center, Boston, USA)

17:00~17:10 Closing Remarks

Toshiyuki Takeuchi (Director of Institute for Mol & Cell Regulation, Gunma Univ.)

17:30~ Party at Restaurant Olive

Supported by Gunma University / Akita University Global COE Program

Information:

Tadahiro Kitamura, Metabolic Signal Research Center

Phone: 027-220-8845, e-mail: kitamura@showa.gunma-u.ac.jp

Tetsuro Izumi, Laboratory of Molecular Endocrinology and Metabolism

Institute for Molecular and Cellular Regulation, Gunma University
